Old Measurements (PET-B)

More Old Measurements (PET-B)

Even Older Measurements (PET-Prime)

Summary Table

Plastic	Scintillator	Light Output
PET-Prime	BC-517L	27.3
PET-B	BC-517L	27.6 (old)
PET-B	BC-517L	28.0 (recent)
PET-B	BC-517P(fresh)	26.0
PET-B	BC-517P (bubbled)	23.0

Plan and Preliminary Conclusions

- Continuing to take data
 - should have several hundred events by weekend
- In retrospect, not much difference between PET-Prime (11.8%) and PET-B (15%)
- $BC-517P/BC-517L=23/27.6=0.83$
- Is 23 enough?
